

BREEZY BUDGET  
FROM BULLFROGOre Shipments Retarded by Lack of  
Transportation Facilities.

## STRIKE IN NEW FORMATION

SURPRISE IN GIBRALTAR'S EQUI-  
TABLE GROUP.

(Special to The Herald.)

Rhyolite, (Bullfrog Mining District), Nev., June 22.—All Rhyolite turned out today to give a rousing send-off to the freighters bearing a consignment of sixty tons of ore from the great Montomery-Shoshone mine. The consignment is bound for Salt Lake smelters, via Tonopah and Reno.

Three great freight outfits, drawn by twenty horses each, are carrying this great amount of extremely rich ore. The Shoshone they are carrying is a portion of the rich talc to use double thicknesses of canvas, some of the ore being so finely divided.

The Shoshone management declares that only second and third grade ore is shipped at this time, as transportation facilities are not favorable at present to the handling of such high-grade ore, but it is said by persons in a position to know that twelve tons of the present shipment will run in value from \$1,000 to \$2,000, the balance ranging from \$200 to \$500. The present consignment will be sampled in Reno, and should arrive in Salt Lake before two weeks have elapsed.

All Rhyolite is banking heavily upon this shipment from the Shoshone, as the immense values of Bullfrog mines and their tremendous capabilities will be clearly demonstrated to the outside world.

## Transportation Facilities Inadequate.

Were the facilities for transporting ore out of this district more favorable, there would be many mines represented at the present time in Salt Lake smelters. On the great Bonanza, or Gibraltar, mountains are several properties capable of sending very rich ore out, but the owners do not desire to pay the unreasonable high rates and undergo the risks incident to a long and tedious desert drive. From Rhyolite to Goldfield, with such a load as it would require to justify the trip, it would take almost a week's time alone; none of the properties being pressed for funds, it is not considered advisable under present conditions to ship.

On the Gibraltar Mines Syndicate's Equitable group on Bonanza mountain there is shipping ore both in the tunnel and on ledge No. 4, at which latter place free gold ore is found in sufficient quantity to pay big money from the surface.

On the Great Eastern property adjoining the Equitable, recently purchased by John McKane, shipping is at a forty-foot depth was encountered some time ago. Any of the many magnificent ledges cutting the top of the steep slope of Bonanza mountain present shipping propositions with depth, often times from the very surface, and without excavation, and several service men are tracing back his actions on the night of the wreck, and expect to be able to show that he had been in the neighborhood of the switch which is said to have been tampered with.

More than \$100 per ton value in gold is not high-grade in Nevada. It is called milling ore, which seems almost sacrilegious in sentiment when it is remembered that the latter property is a grade many outside propositions are, as the Treadwell mine of Alaska, for instance.

On the Tramp property on Bonanza mountain, and the adjoining properties, such as the Elipse and Denver, shipping ore is found, and from the latter property, more advanced in development work, ore has already been shipped. But these properties, where all the conditions for handling and treatment are complete.

## Strike in New Formation.

A formation new to the Bullfrog mining district was encountered in the shaft of the Shoshone National Bank property today, and has set the experts of Rhyolite to speculating as to what may soon be expected on properties being developed on the "flat." At thirty-three feet deep was encountered a formation of spar, manganese of iron and quartz, resembling in all respects the formation found in the great Mizpah mine at Tonopah, and which is always found in close proximity to high-grade values.

The formation appears to be on the porphyry hanging wall that they are going through on the twenty-five foot level, and in the opinion of the mining and formation experts of the district, the owners of the Shoshone National bank have good cause to feel elated. The location of this property is between the Montgomery Mountain company and the Bullfrog National Bank Mining company, and all lines with each of them, covering the entire flat between these two properties. It also corners with the Schwab-McKane property.

The hoist on the Bullfrog National Bank is now in working order, and three shifts of men will be put to work in the No. 1 shaft, and all the high-grade ore will be sacked and shipped. Superintendent Walter Smith has also started a No. 3 incline shaft, and they

## YOUNG SWEDEN AT LAGOON IN THE DANCE OF THE FATHERLAND.

COMPANY OFFERS  
\$2,000 REWARDSwitch at Mentor Was Undoubtedly  
Open.

## BECKWITH JEWELS FOUND

TWO INQUESTS TO BE COM-  
MENCED MONDAY.

Cleveland, June 23.—A marked improvement was reported today in the condition of Rudolph Cordua of Brooklyn, N. Y., and Fireman A. A. Gorman, the only victims of the Mentor accident who remain in Cleveland hospitals. It is believed that both men will recover.

Coroner Slocum of this county will go to Mentor to examine into the cause of the disaster which killed eight persons in connection with all the victims who died in Cleveland. The coroner of Lake county, in which Mentor is located, will take charge of the inquest over those who died at the scene of the disaster. It is expected that both hearings will commence next Monday.

A bag containing jewels valued at \$2,000, the property of S. C. Beckwith of New York, supposed to have been stolen from the wrecked train at Mentor, was found today. It had been picked up in the wreckage and brought to the Lake Shore claim agents' office in Cleveland.

Before the whereabouts of the jewels was known a search had been started for them on behalf of Mrs. Beckwith. Mr. Beckwith died soon after being removed from the wreck.

A man under suspicion of having caused the Lake Shore wreck is being shadowed, and several service men are tracing back his actions on the night of the wreck, and expect to be able to show that he had been in the neighborhood of the switch which is said to have been tampered with.

## Reward Offered.

State Railroad Commissioner Morris, who today started an investigation of the wreck, is quoted as saying that the switch was undoubtedly open and that some one set it that way just a short time before the flyer struck it. He also stated that the engine did not leave the tracks until it had traveled fifty feet on the sidetrack.

The Lake Shore Railroad company tonight offered a reward of \$2,000 for the arrest or for information leading to the arrest of the person or persons responsible for the wreck of the Twentieth Century limited at Mentor, O., Wednesday night.

## SUMMER COLDS.

Laxative Bromo Quinine, the world wide Cold Cure, removes the cause, cures, and a vast amount of ore is being blocked out for future disposition.

A formation new to the Bullfrog mining district was encountered in the shaft of the Shoshone National Bank property today, and has set the experts of Rhyolite to speculating as to what may soon be expected on properties being developed on the "flat." At thirty-three feet deep was encountered a formation of spar, manganese of iron and quartz, resembling in all respects the formation found in the great Mizpah mine at Tonopah, and which is always found in close proximity to high-grade values.

The formation appears to be on the porphyry hanging wall that they are going through on the twenty-five foot level, and in the opinion of the mining and formation experts of the district, the owners of the Shoshone National bank have good cause to feel elated. The location of this property is between the Montgomery Mountain company and the Bullfrog National Bank Mining company, and all lines with each of them, covering the entire flat between these two properties. SWEETS ENJOY  
A DAY'S OUTINGNational Dance the Feature of the  
Celebration at the Lagoon.

## PARTICIPANTS IN COSTUME

GIRLS AND WOMEN ENGAGE IN  
AQUATIC AND FIELD SPORTS.

The Swedes of Utah, but more particularly those of Salt Lake, had an outing yesterday at the Lagoon and it was estimated that at least 2,000 were present to enjoy the festivities. It was the tenth annual outing of the Nordic Literary society, and members come from every state in Utah to celebrate the occasion. Before going to the resort a "bus filled with musicians and young women who were to take part in the national dance, went through the streets of the city and stirred up enthusiasm to that extent that all the trains during the afternoon were laden to their capacity. The principal feature of the Lagoon was the national dance, known as "Dallarna-Polska." Eight couples of young folks engaged in this dance and they were dressed in the festive costume of their country. The young men wore knickerbockers and waistcoats, the latter sleeveless, of orange color trimmed with scarlet braid; white stockings supported by scarlet colored garters; pomps with scarlet colored ties and rosettes; white hats with scarlet ribbons, and white shoes. The young women were attired in an even more picturesque manner. Each wore a blue skirt, over which was laid an apron of green, yellow and red, black and white bars, with alternating stripes of the same colors. Then each had a red ribbon belt with a white waist and a low cut outside green corset and shoulder straps. Each wore a black coral shell shaped hat with red streamers, red stockings, and to complete the costume each carried a Norwegian, the face of which was replete with green and white designs.

## Enjoy the National Dance.

The dance took place at 3 o'clock and was repeated at 7 o'clock in the big pavilion in some respects it resembled the old fashioned quadrille, but it differed from that in the sequence movements. The dance consisted in the man kneeling on one knee at a certain measure in the music and the woman would then lightly on the bent knee for a moment and the next instant both would be whirling around to the strains of a waltz movement. Then would come the courtship dance, in which the man would move time to be broken suddenly by the whirling of arms, and then the couples would dart out again into the mazes of the waltz.

A very popular favor among the crowd were the athletic sports. The Swedish band led the way. Each member, as well as everybody in the procession, carried the national colors of their native land—blue and yellow, and the members of the "Kinnika" or drummers wore badges with the cross on a field of blue. The drummers, A. M. Rosel, T. Janson, J. R. Edholm, C. J. Gylenswan and C. J. Lindstrom.

The field sports were run off on time. The first contest of the day was a 100 yard race between the men of the two teams. It was only a short pull, about 20 yards, and the contestants ran off on even terms. The winner was Mrs. Olea Lindberg, with Miss Sigrid Backman close second, and Mrs. Gise Backman third. The winner in the men's division was Gus Backman with A. Carlsson second and John Anderson third.

There was a hand concert at 5 o'clock, a rendition of the national dance at 7 and a performance of a play in Swedish at 8. The traffic evening began took out large crowds, so much so that it became necessary to run a special from the Lagoon at midnight.

The condition of affairs existing in the Bullfrog mining district in a mining way has just occurred. There have been such unheard of discoveries in this part of the mining world that those who become somewhat calloused to such conditions are not moved perceptibly at a great strike, and positively not at all by an immense ledge of millinery ore. But to a person not thoroughly familiar with this state of affairs it becomes difficult indeed to conceive the real facts and a person desiring what he is actually seeing for himself often pauses and wonders whether or not his accounts will be credited. But a week's faithful tramp over a great mountain, from whose very surface to reasonably great depths, quartz and the common ore, the despised black eye porphyry, carry shipping and milling values in gold, where scarcely an outcropping fails to leave gold in the pan, and where magnificent ledges as wide as 200 feet can be easily traced for over a mile, will convert any person.

The country rock on the surface of Bonanza Mountain has panned colors, but heretofore the porphyry has never been associated with ore. No one who had the enthusiasm to declare that the country rock would ever be milled, but it certainly will be in the Bullfrog country.

The people of the district are spoiled. They are like children fed on rich candies, refusing to deal with the cheaper and more common sort. There have been such unheard of discoveries in this part of the mining world that those who become somewhat calloused to such conditions are not moved perceptibly at a great strike, and positively not at all by an immense ledge of millinery ore. ## JUDGE NEALE DEAD.

Lebanon, Ind., June 23.—Judge Stephen Neale, author of the fourteenth amendment to the United States constitution, died at his home in his city today.

CAPT. GRAHAM'S  
GRATITUDESuffered from Sores on Face and  
Back—Doctors Took His Money  
But Did No Good—Skin Now  
Looks Clear as a Baby's.ANOTHER CURE BY  
CUTICURA REMEDIES

Captain W. S. Graham, 1321 E 8th St., Wheeling, W. Va., writing June 14, '04, says: "I am so grateful I want to thank God that a friend recommended Cuticura Soap and Ointment to me. I suffered for a long time with sores on my face and back. Some doctors said I had blood poisoning, and others that I had barbers' itch. None of them did me any good, but they all took my money. My friends tell me my skin now looks as clear as a baby's, and I tell them all that Cuticura Soap and Ointment did it."

## STILL ANOTHER CURE

Neck Covered With Sores, Hair  
Fell Out, Wild With Itching

Mr. H. J. Spalding of 104 W. 104th St., New York City, says: "For two years my neck was covered with sores, the disease spreading to my hair, which fell out, leaving an unsightly bald spot, and the sores, inflammation, and merciless itching made me wild. After a few applications of Cuticura the sores subsided, the hair grew thick and healthy as ever."

## AND STILL ANOTHER

"For over thirty years I suffered from painful ulcers and an eruption from my knees to my feet, and could find neither doctors nor medicines to help me, until I took Cuticura which cured me six months. (signed) M. C. Moss, Gainesville, Tex."

Cuticura Soap, Ointment, and Pills are sold throughout the world. Patent Drug &amp; Chem. Corp., Boston, 200 N. Dearborn St., Chicago, Ill.

Send for "How to Cure Every Humour."

Stricture

permanently cured in 3 to 20 days. No matter how long standing.  
Cured quickly and radically in 20 to 40 days by my own famous method.  
Cured in three to ten days without the use of poisonous drugs.  
Radical cures in 60 to 90 days. I remove ALL poisons from the system without the aid of mercury or potash.  
Cured in one week safely without cutting, danger or detention from business, by my own method.  
Cured in five to fifteen days without cutting, stretching, pain or loss of time. It is a marvelous cure.

**Don't Delay--Come Today**

I MAKE NO CHARGE for a friendly talk or correspondence. Come to me in the strictest confidence. I have been exclusively treating private and special diseases of men for thirty years. Nothing escapes me or devies or money. I am lacking in no office equipment. I will use you honestly, treat you skillfully and restore you to health in the shortest time, with the least medicines, discomfort and expense practicable. I guarantee to cure any case I undertake. If you cannot call, write for my home cure.
